Education

Course Name	Institute Name	University Name	Year of Passing	Score Details (%/CGPA)	Course Type
B.Tech	Narula Institute of Technology, Agarpara	Maulana Abul Kalam Azad University of Technology (MAKAUT), West Bengal	2027	CGPA: 8.64	Full-time
12th	Army Public School, Barrackpore	CBSE	2023	79.80%	Full-time
10th	Army Public School, Barrackpore	CBSE	2021	95.00%	Full-time

Technical Skills

Programming Languages: Python, Java, C, JavaScript
Backend & Web Development: FastAPI, REST APIs, HTML, CSS, JavaScript
Databases: MongoDB, MySQL
Machine Learning & Data Science: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
Tools & Platforms: Git, GitHub, Streamlit, Power BI, Excel
Core CS Subjects: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Experience

SHADOWFOX *Feb 2026*
Data Science Intern — Virtual 01 Feb 2026 – 28 Feb 2026

- Performed data preprocessing, exploratory data analysis, and visualization using Python to identify patterns, trends, and insights from environmental and real-world datasets.
- Completed an end-to-end data analytics project involving dataset exploration, data cleaning, research-question formulation, in-depth analysis, and data visualization.

Projects

VOYEXA-AI
AI-Based Personalized Trip Planning System

- Tools & technologies used: Python, FastAPI, MongoDB, Scikit-learn, Gemini API
- Developed an AI-powered travel recommendation platform using machine learning-based filtering and personalized recommendation techniques.
- Built a recommendation engine to suggest destinations based on user budget, preferences, and travel constraints.
- Designed RESTful APIs using FastAPI to support trip planning and recommendation workflows.
- Integrated Gemini API chatbot for intelligent travel assistance and automated PDF itinerary generation.
- Applied data preprocessing and recommendation algorithms to improve personalized destination recommendations.

Patents

AN INTELLIGENT BOTTLE FOR GOAL-ORIENTED HYDRATION AND HEALTH *29 May 2026*
IoT-Based Smart Hydration System Application No.: 202631032874 A

- Developed an IoT-enabled smart hydration system integrating real-time fluid-level monitoring with biometric and environmental sensing.
- Implemented dynamic hydration goals using weather synchronization and sensor-based monitoring for personalized hydration management.
- Incorporated solar-assisted power management and eco-friendly, thermally insulated materials for extended field use.
